

Ananthu Jayakumar

AI & Software Engineer | AI Automation • Data Analytics • Enterprise Solutions

Kochi, India | Open to Relocation to UAE | ananthujayakumar02@gmail.com | +91 9495731973 | LinkedIn | Portfolio

SUMMARY

Software Engineer with hands-on experience in AI-powered applications, business automation, enterprise integrations, data processing, and full-stack development. Experienced with Python, LLMs, AI agents, REST APIs, SQL, workflow automation, data transformation, dashboards, and enterprise platforms. Skilled in turning business requirements into practical technical solutions and automating repetitive workflows. Strong analytical mindset with a keen interest in AI, data-driven decision making, process improvement, and emerging technologies.

CORE SKILLS

AI & Generative AI: LLMs, Generative AI, AI Agents, Agentic AI, Prompt Engineering, RAG, Embeddings, Function Calling, LLM APIs, LangChain, LangGraph

AI Automation: n8n, Power Automate, AI Workflows, Workflow Automation, Process Automation, Multi-step Workflows, AI-assisted Development

Programming: Python, C#, JavaScript, SQL, C/C++

Backend & APIs: FastAPI, Django, .NET, REST APIs, JSON, Webhooks, API Integration, Data Transformation

Data & Analytics: SQL, Microsoft Excel, Power BI, Data Analysis, Data Visualization, KPI Analysis, Reporting, Data Validation, Data Transformation, SQLite, SQL Server

Enterprise & Business Systems: SharePoint, Microsoft 365, Jira, Test Management Systems, ERP Systems, CRM Integrations, Enterprise Data Workflows

Frontend: React, Next.js, React Native, HTML, CSS

Databases & Tools: SQL Server, SQLite, Vector Databases, Git, Cursor, AI Coding Assistants

PROFESSIONAL EXPERIENCE

Trainee Software Engineer — Nalashaa Solutions

Kochi, India

Jun 2025 – Present

- Built AI-powered internal tools and business-solution accelerators using Python, LLMs, automation workflows, APIs, and enterprise systems.
- Developed an AI workflow that converts functional specifications into structured issue-tracking user stories, improving the requirements-to-development workflow.
- Developed a middleware-style enterprise integration platform connecting SharePoint, databases, Jira, REST APIs, ERP systems, and web-crawled sources, including data extraction, transformation, aggregation, validation, and source-to-destination transfer.
- Built a productivity and analytics platform that collects data from enterprise systems, calculates productivity, quality, and budget metrics, updates enterprise content systems, and distributes recurring management reports and notifications.
- Built automated workflows using Microsoft 365 services and Power Automate to connect business applications, notifications, email workflows, and enterprise processes.
- Developed internal automation solutions including phishing-awareness tracking, organization-wide notification workflows, acknowledgement tracking, and automated document processing.
- Modernized a legacy Blazor/.NET application to Next.js and .NET 10 using AI-assisted development, completing the migration in three days.

Intern Software Developer — Nalashaa Solutions

Kochi, India

Jan 2025 – Apr 2025

- Developed applications using C#/.NET and Microsoft SQL Server, working with backend logic, databases, debugging, and application development.

SELECTED PROJECTS

- Agentic Talent Acquisition System** — Built an AI-powered recruitment workflow using Python, FastAPI, LLM APIs, browser automation, and SQLite to parse job descriptions, discover candidates, evaluate candidate-job fit, and generate personalized recruitment communications.
- AI Browser Automation Reliability** — Developed reliability mechanisms for AI-driven browser workflows, including dynamic selector discovery, session-expiry detection, lazy-loaded result handling, retries, and normalization of inconsistent LLM outputs.
- PromptOS — AI Orchestration Platform** — Designing an AI orchestration platform with intelligent model routing, semantic prompt caching, persistent context, multi-agent workflows, cost analytics, and centralized AI-provider governance.
- Enterprise Data & Analytics Automation** — Worked on automated collection, transformation, validation, KPI calculation, reporting, and visualization of data from multiple enterprise systems.

EDUCATION

B.Tech — College of Engineering Trivandrum

2021 – 2025 | CGPA: 8.85/10

LANGUAGES

Malayalam: Native | English: Professional | Tamil: Conversational | Hindi: Conversational
